ABOUT ME

Computer Science & Engineering graduate with a strong foundation in programming, web development, and problem-solving. Passionate about learning new technologies, working in team environments, and contributing to innovative software solutions. Seeking an opportunity to apply my technical skills and grow professionally in the IT industry.

PROJECTS

Online Photographer Booking

- Designed and developed an integrated web-based platform that connects photographers and clients in a seamless way. The system allows users to explore portfolios, compare services, book photography sessions, and make secure online payments.

Weather Forecasting System

- Developed a weather forecasting application that predicts atmospheric conditions based on parameters such as temperature, humidity, and wind speed. The system applies machine learning techniques and pattern recognition to analyze data trends and generate short-term forecasts.
